

RF TEST SETS:

A pair of loop antennas and a pair of rod antennas are offered as RF Test Sets for measuring shielding effectiveness in accordance with MIL-STD 285 and NSA 65-6. Each test set contains an active receive only antenna and a passive transmit antenna. The pair of antennas in each test set is individually calibrated and supplied with a signed certificate of conformance.

APL-130/A: H-Field Test Set for MIL-STD 285 testing, 1 kHz to 30 MHz. **APL-130/A** comprises ALA-130/RS, an active loop antenna and **PLA-130/A**, a passive loop antenna.

APW-100/A: E-field Test Set for MIL-STD 285 and NSA 65-6 Testing, 1 kHz to 100 MHz. **APW-100/A** comprises our **RAM-110/B** rechargeable active monopole antenna with counterpoise and a passive whip antenna, **PWP-1030/B**.
